EDUCATION

**THE UNIVERSITY OF TENNESSEE
AT CHATTANOOGA**
*Bachelor of Science in Social Work
(B.S.)*

AREAS OF EXPERTISE

Product Management | 7+ yrs
Business Analysis | 5+ yrs
Product Strategy | 2+ yrs
Project Management | 4+ yrs
Operations Management | 4+ yrs
Process Improvement | 4+ yrs
Customer Success | 9+ yrs
Technical Support | 9+ yrs

TECHNICAL SKILLS

ERP Systems (M365 Dynamics,
NetSuite, Notion)
Advanced Excel
Programming (C++ & Python)
Business Intelligence (PowerBI)
Data Modeling (Fabric)
Repository & Version Control
(GitHub, YouTrack)
Low Code Systems
Cloud Architecture
Data Center, Networking &
Storage
Support Ticketing Software
(Zendesk, Gorgias)
3D Modeling & CAD (Autodesk)

CERTIFICATIONS

Amazon Web Services Certified
Cloud Practitioner
Microsoft Azure AZ900 & Copilot
Certification
Google Cloud Platform Certified
Digital Leader

PROFESSIONAL SUMMARY

Results-driven product leader with 10+ years of experience in product strategy, engineering, and service delivery. Proven ability to define long-term vision, influence executive direction, and guide hardware/software portfolios from concept to market adoption. Skilled at translating complex customer needs into scalable solutions, bridging user-facing and technical teams. With a background spanning consulting, cybersecurity, cloud, and customer success, I excel at cross-functional collaboration and lead with a people-first approach rooted in humility, curiosity, and strategic execution

RELEVANT PROFESSIONAL EXPERIENCE

PlayCore | Fitness Product Manager

February 2026

- o Singularly lead PlayCore's outdoor fitness equipment product strategy, to update outdated fitness equipment across the entire organization from a top-down perspective, leading in the Corporate Innovation team, driving Fitness initiatives, goals, and execution to PlayCore's multitude of outdoor equipment brands.
- o Decommission outdated fitness products and determine and lead decision of modern replacements by providing modernized engineering and resistance mechanism guidance through deep understanding and knowledge of fitness industry.
- o Serve as lead Data Analyst for market conditions, internal sales data, and future projections by creating C-Suite facing and digestible dashboards and presentations using Power BI, PowerPoint, Excel, and similar tools.
- o Perform root cause analysis and on-site engineering reviews of existing products at customer installs, PlayCore-owned manufacturing facilities, and partner manufacturing facilities to identify product failures for PlayCore's 50+ existing and outdated product line to inform needed changes and improvements for new product line
- o Serve as lead Project Manager for entire product line decommission, redesign, and launch of 50+ products, including 20+ all-new products for PlayCore.
- o Serve as single contact point for internal and external sales teams, distributors, and production teams.
- o Write, manage, and upkeep technical installation, maintenance, and repair guides.
- o Manage and oversee the organization of Parts, Designs, Assemblies, Components, in engineering part management system
- o Support engineering team in adoption of and adherence to new engineering part management system
- o Provide initial, and long-term sale-enablement, marketing guidance, and product market positioning to marketing and sales team
- o Provide engineering overview, guidance, and direction to design and engineering direct reports for the drafting, design, creation, prototyping, and production of completed product.
- o Negotiate parts, product, pricing and sourcing with suppliers and manufacturers, to manage and create relationships to hand off to procurement
- o Regularly meet with C-Suite and Executives to guide and provide product strategy direction based on product, market, and data research

Totem | Lead Product Manager

February 2025 – February 2026

- o Own the product strategy, roadmap, and execution for Totem's first hardware + mobile app ecosystem, from concept through launch, adoption, and continuous improvement.
- o Led the go-to-market launch of Totem's consumer hardware and mobile app, achieving adoption of 8,500+ users in 60 days across iOS and Android.
- o Built the company's product discovery and feedback engine, connecting engineering, operations, support, and leadership through structured prioritization and roadmap planning.
- o Led strategic research and managed a 200+ user beta program, synthesizing insights into product positioning, feature direction, and long-term strategy.
- o Conducted viability and opportunity assessments across product lines, advising executives on competitive landscape, market fit, and investment prioritization.
- o Serve as the senior cross-functional leader for product execution—driving alignment between hardware engineering, software development, firmware teams, customer success, marketing, and executive leadership.
- o Mentor team members and lead company strategy in modern product practices, discovery techniques, and customer-centered product development.

Conversant Group | Senior Business Analyst – Cybersecurity Product Strategy

June 2024 – February 2025

- o Collaborated directly with the Office of the CTO to shape early-stage cybersecurity product strategy based on market analysis, competitive research, and customer needs.
- o Participated in cross-functional product discovery for cybersecurity offerings, translating findings into feature requirements and customer-facing value propositions.

- o Supported delivery for 20+ client cybersecurity engagements, ensuring solutions aligned with desired outcomes and evolving roadmap direction.
- o Contributed to go-to-market planning and product messaging through technical insights, discovery summaries, and data-driven recommendations.

SHI

Technical Product Specialist – Data Center Solutions

December 2023 – June 2024

- o Managed large-scale data center deployment projects end-to-end, coordinating requirements intake, solution validation, and customer delivery.
- o Partnered with OEMs (Cisco, HP, Pure) to translate customer requirements into aligned product offerings; influenced partner roadmaps using documented customer needs.
- o Helped grow the regional data center segment from \$1M → \$11M per quarter through improved solution scoping, customer alignment, and delivery efficiency.
- o Acted as a technical liaison between customers, sales, engineering, and project management, ensuring clarity of requirements and solution intent.

Cloud Product Consultant

July 2022 – December 2023

- o Served as a Cloud Product SME, advising Account Executives and Fortune 1000 clients on AWS, Azure, and GCP solutions.
- o Conducted requirements discovery and solution scoping for cloud modernization projects, translating business needs into technical product recommendations.
- o Supported partner-aligned product strategy through market research, customer feedback, and competitive analysis.
- o Created internal product training and sales enablement materials, contributing to a 90% certification pass rate for new Cloud SMEs.
- o Provided input to leadership on emerging cloud-market trends, shaping the evolution of SHI's cloud services portfolio.

Staymobile

Product Owner – Professional Services

January 2020 – July 2022

- o Owned the product and service delivery roadmap for enterprise mobility programs covering 300,000+ devices across 150+ education sites.
- o Led backlog prioritization, discovery, requirements definition, sprint planning, and release readiness for service-delivery tooling and workflows.
- o Delivered a new modular service-delivery program for K-12 and higher education, turning complex onsite deployments into configurable “service packages” that improved scalability and customer adoption.
- o Conducted ongoing discovery—interviews, workflow analysis, time studies, and field observation—to identify customer and technician pain points, converting insights into actionable product improvements.
- o Collaborated with Product, Engineering, Operations, and Customer Success to design UX, workflow, and feature enhancements, ensuring alignment with service contracts and user needs.
- o Increased service delivery efficiency by ~20% through bottleneck removal, workflow optimization, and resource utilization analysis.
- o Drove release readiness: documentation, internal training, stakeholder communication, and post-launch retrospectives.
- o Built operational KPIs and reporting dashboards to inform roadmap decisions and validate product outcomes.

Associate Product Owner

October 2019 – January 2020

- o Performed foundational business analysis across customer support and service workflows—mapping processes, documenting gaps, and identifying root-cause issues affecting customer experience.
- o Rebuilt the customer success framework using structured analysis; introduced standardized KPIs, SOPs, and training programs to increase consistency and improve service outcomes.
- o Analyzed ticket trends and escalation patterns to surface recurring pain points, enabling data-driven prioritization for the product backlog.
- o Acted as a bridge between Customer Support and Product, translating customer insights into clear requirements, user stories, and acceptance criteria.
- o Improved ticket routing logic and escalation documentation, increasing CSAT, first-contact resolution, and response time efficiency.
- o Established repeatable feedback loops and performance dashboards, increasing visibility for leadership and engineering teams.
